Introduction

The Centers for Medicare & Medicaid Services (CMS) [Care Compare](#) website provides a single user-friendly interface that consumers can use to understand information about doctors, hospitals, long-term care hospitals, and other health care services instead of searching through multiple tools. Care Compare enables patients and caregivers to make informed decisions about healthcare based on cost, quality of care, volume of services, and other data. Information about the quality measures on Care Compare are presented similarly and clearly across all provider types and care settings. Consumers can select multiple facilities and compare their performance on various quality metrics.

This document provides information about the Long-Term Care Hospital (LTCH) Quality Reporting Program (QRP) data on Care Compare. Care Compare provides data on over 340 LTCHs. More information about the LTCH QRP measures displayed on Care Compare can be found by visiting the [LTCH QRP Measures Information](#) webpage.

Care Compare information about LTCHs is typically updated or refreshed quarterly in March, June, September, and December; however, the refresh schedule is subject to change and not all measure data will be updated during each quarterly release. See Appendix A: Care Compare Anticipated LTCH Refreshes and Data Collection Timeframes for the full list of LTCH measures contained in the downloadable data found on the Provider Data Catalog website, along with information about reporting cycles for each measure.

Links to download the data from the zipped comma-separated value (CSV) flat file formats can be found on the Provider Data Catalog website. When archived data snapshots become available, they will also be provided on the [Provider Data Catalog](#) website.

Care Compare and the Provider Data Catalog are publicly accessible websites. As works of the U.S. government, the data on these websites are in the public domain and permission is not required to reuse them. An attribution to the Centers for Medicare & Medicaid Services as the source is appreciated. Leading Zeros in Excel

Due to a limitation in how Microsoft Excel removes leading zeros when opening comma separated value (CSV) files, instructions are provided on the Provider Data Catalog to assist you. For the most up to date information, please reference Frequently Asked Question and the question titled, “How do I download files in Excel?” The Frequently Asked Questions can be found here: <https://data.cms.gov/provider-data/about#faq-1>.

¹ File names will be updated with each refresh of Care Compare to include the corresponding month and year of the refresh (mmmmyyyy) as noted in the *File Name* column.

² The readme.txt file is included in the downloadables by selecting “Download all datasets” or downloading the archived data snapshots.
