

Methodology for Pending Initial Physician Non Physician Logging and Tracking (L&T)

The logic is to get all the PECOS L&Ts with the submittal reason of “Initial Enrollment” for 855I and 855O and in an open status (not finalized). The PAC_ID of that initial L&T should not have an Approved enrollment or Opt-Out affidavit. It is for physicians and non-physicians enrolling for the first time and pending. We generate separate files for physicians and non-physicians.

Pending Initial L&Ts Physicians – The Initial Physician Applications Pending Contractor Review files are lists of applications pending contractor review. These pending applications have NOT been processed by the CMS contractors. These lists have been compiled to allow individuals the ability to verify that an application has been submitted and is awaiting processing.

Pending Initial L&Ts Non-Physicians – The new Initial Non-Physician Applications Pending Contractor Review files are lists of applications pending contractor review. These pending applications have NOT been processed by the CMS contractors. These lists have been compiled to allow individuals the ability to verify that an application has been submitted and is awaiting processing.
