

Medicare Fee-For-Service Public Provider Enrollment Data Dictionary

Term Name	Variable Name	Definition
National Provider Identifier	NPI	An NPI is a 10-digit unique numeric identifier that all providers must obtain before enrolling in Medicare. It is assigned to health care providers upon application through the National Plan and Provider Enumeration System (NPPES).
PECOS Associate Control ID	PECOS_ASCT_CNTL_ID	Provider associate level variable (PAC ID) from PECOS database used to link across tables. A PAC ID is a 10-digit unique numeric identifier that is assigned to each individual or organization in PECOS. All entity-level information (e.g., tax identification numbers and organizational names) is linked through the PAC ID. A PAC ID may be associated with multiple Enrollment IDs if the individual or organization enrolled multiple times under different circumstances.
Enrollment ID	ENRLMT_ID	Provider enrollment ID from PECOS database used to link across tables. An Enrollment ID is a 15-digit unique alphanumeric identifier that is assigned to each new provider enrollment application. All enrollment-level information (e.g., enrollment type, enrollment state, provider specialty and reassignment of benefits) is linked through the Enrollment ID.
Provider Type Code	PROVIDER_TYPE_CD	Provider enrollment application and enrollment specialty type, see PROVIDER_TYPE_CD - Reference for description of values. This field shows the provider's primary specialty code. For practitioners and DME suppliers, please see the Secondary Specialty file for a list of secondary specialties (when applicable). Only about 20% of practitioners and DME suppliers have at least one secondary specialty.
Provider Type Description	PROVIDER_TYPE_DESC	Provider enrollment application and enrollment specialty type description, see PROVIDER_TYPE_CD - Reference for description of values.
State Code	STATE_CD	Provider enrollment state, abbreviated location, see STATE_CD - Reference tab for description of values. Providers enroll at the state level, so one PAC ID may be associated with multiple ENRLMT_IDs and multiple STATE_CD values.
First Name	FIRST_NAME	Individual provider first name.
Middle Name	MDL_NAME	Individual provider middle name.
Last Name	LAST_NAME	Individual provider last name.
Organization Name	ORG_NAME	Organizational provider name.
Gender	GNDR_SW	Individual provider gender, see GNDR_SW - Reference for description of values.
Reassigning Benefits Enrollment ID*	REASGN_BNFT_ENRLMT_ID	Enrollment ID of the provider reassigning benefits to bill to Medicare. To find enrollment information for providers reassigning their benefits to bill to Medicare, link REASGN_BNFT_ENRLMT_ID to ENRLMT_ID in the Enrollment file.
Receiving Benefits Enrollment ID*	RCV_BNFT_ENRLMT_ID	Enrollment ID of the provider receiving reassignment benefits to bill to Medicare. To find enrollment information for providers receiving reassignment benefits to bill to Medicare, link RCV_BNFT_ENRLMT_ID to ENRLMT_ID in the Enrollment file.
City Name**	CITY_NAME	Provider practice location city. Each practice location is linked to an Enrollment ID. If any other provider reassigns benefits to an Enrollment ID listed in the Practice Location file, the practice location is also associated with that other provider.
Zip Code**	ZIP_CD	Provider practice location zip code. Each practice location is linked to an Enrollment ID. If any other provider reassigns benefits to an Enrollment ID listed in the Practice Location file, the practice location is also associated with that other provider.
