

Revoked Medicare Providers and Suppliers – Data Methodology

Overview

This dataset contains information on providers and suppliers who are revoked from the Medicare program pursuant to **42 CFR § 424.535** and under an active re-enrollment bar. Data is sourced from the Provider Enrollment, Chain and Ownership System (PECOS).

Inclusion Criteria

Providers appear on this list when:

1. An **active re-enrollment bar** is in effect.
2. **First-level appeal** has been exhausted or not filed.

Key Points

- Inclusion on the list occurs only after not timely filing a first-level appeal or after an unfavorable first-level appeal decision.
- Absence from this list does not indicate a current **Medicare enrollment** or eligibility to enroll.
- Providers may still have other **active Medicare enrollments** under their TIN, even if some enrollments have been revoked.

Data Limitations

- **Point-in-time snapshot** - status may change due to pending appeals or recent actions.
- **Time lag** exists between when a revocation occurs and list inclusion due to mandatory appeal periods.
